PROJECTS

INCRIDIBLE REAL INDIA
Blogging Website
- Worked alongside frontend team using HTML, CSS, JavaScript, and jQuery to enhance website's visual appeal and user-friendliness.
- Tasks included selecting color schemes, organizing layout structures, incorporating imagery, and refining navigation elements to present India's cultural heritage and natural beauty in an engaging manner.
- Strived to ensure effortless navigation, immersive content experience, and enriched overall user experience through integration of interactive elements and intuitive design principles.

DLS ENGINEERS
Business and Corporate Website
- Teamed up with the design department to create the UI and frontend for DLS Engineers, employing HTML, CSS, JavaScript, and jQuery.
- Ensured that the website's design resonated with DLS Engineering's branding and messaging, leading to a sleek and functional interface.
- Through iterative development and feedback, crafted a user-friendly website that effectively highlights DLS Engineering's services and expertise.

OUTBUSTERS
French Movies & TV Show Platform
- Converted design concepts into functional website components using HTML, CSS, and JavaScript.
- Implemented responsive layouts, intuitive navigation, and interactive features to create a seamless user experience.
- Collaborated closely with designers and backend developers to ensure seamless integration of frontend elements with the backend infrastructure, resulting in a polished and user-friendly platform for international film and series exploration.

PERSONAL PORTFOLIO
Personal Portfolio made on html and react.js
- Collaboratively building a react JS portfolio for myself with guidance from experienced seniors and friends to accelerate learning.
- Levaraging the support from react JS community members to create a impectful and knowledge-enricging portfolio.
- Embracing mentorship and teamwork to craft an impresive showcase of project and skills for professional growth in react.js development.
